

# DEGA TUNNEL UPDATE #3

Story: Gary Elles/Photos: MSA Staff

This is an update of the new traffic Super Tunnel at Talladega Super Speedway.

On January 23rd an update event was held at the track Media Center in the Infield. Honored guests included The Alabama Gang members of Donnie Allison and Red Farmer, both also inducted into several racing Hall of Fames.

The first order of business was to ride shuttle buses to the back side of the track to witness the progress of the new tunnel. Red Farmer even got in a hi-lift to signal his approval of the progress (as seen in the pictures). The new tunnel will have a weight of 3.2 million pounds to keep it from trying to float during times of rain and high water table conditions. Then a press conference was held at which was punctuated by some old and wild tales by Donnie and Red.

This spring race will also feature a new Premium Finish Line RV Area along with new Infield shower trailers to make a better experience for infield campers. The new RV spots were almost all sold out at press time. The spring race is scheduled for April 26-28 and will include a Friday ARCA race, a Saturday Xfinity race and of course Sundays Big 500 mile Monster Energy Cup Series Race. See you at the Best RaceTrack in NASCAR.
